### Your home energy report

Thank you for using the Home Energy Check tool. We have analysed your answers to put together your personalised home energy report. This report tells you our estimate of how much energy a home like yours could be using and how much that energy costs.

The energy you use in your home leads to carbon emissions that contribute to climate change. The report tells you how much carbon dioxide your home could be currently emitting. We also give you an indication of the Energy Performance Certificate rating that your home might currently achieve.

Most importantly this report tells you about the home improvements you identified in the Home Energy Check. We tell you how much these improvements could save both in energy bill and carbon emission terms, and how they could improve your energy performance certificate rating. We give you a quick guide to what you need to think about in installing these measures – how much they might cost and how much work is involved in fitting them.

#### YOUR ANNUAL FUEL BILL

Based on what you've told us about your home and household, we've estimated:

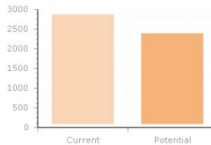

Your estimated current fuel bill : £2,950  
 After installing energy saving measures : £2,469  
 Estimated savings from bill : £481  
 Any additional income: £0

#### YOUR ANNUAL CARBON EMISSIONS

The carbon dioxide that causes climate change is a result of generating energy to heat and power homes. By saving energy in the home, we help prevent climate change. The average UK home emits five tonnes of CO2 each year (1 tonne = 1,000kg CO2).

Estimated current carbon emissions : 5,450 kg CO<sub>2</sub>  
 After installing : 4,130 kg CO<sub>2</sub>  
 Total annual carbon savings : 1,320 kg CO<sub>2</sub>

Potential fuel bill savings

Potential improvement in EPC banding

This report is not valid as an Energy Performance Certificate (EPC). If you obtain an EPC for your property you may obtain a different rating to that included here.

# Energy Efficiency Schemes

## Warmer Homes Scotland

- A range of energy saving improvements available
- Homeowners and private sector tenants
- Eligibility criteria
- Costs usually met by the Scottish Government

## Home Energy Scotland Grant and Loan

- Grant funding for energy efficiency improvements
- Optional interest-free loan
- Homeowners

## Area Based Scheme

- Area specific
- Delivered by councils with local delivery partners (eg Changeworks)
- Free or discounted measures

# Funding Finder Tool

Available via: [homeenergyscotland.org/find-funding-grants-and-loans](https://homeenergyscotland.org/find-funding-grants-and-loans)

The screenshot shows the top of the website with the Home Energy Scotland and Net Zero Scotland logos. Below is a navigation bar with links for Home Energy Scotland, Advice hub, and Funding Finder. A welcome message reads "Welcome to Home Energy Scotland's Funding Finder". The main content area has an orange background with the text "Look for grants, discounts and funding schemes in your area." and "To get started, enter your postcode:" followed by a "Postcode" input field and a "SEE WHAT'S AVAILABLE" button. At the bottom, there is a "Used our tools before? Sign in here." link and an "Email address" input field.

The screenshot shows a list of funding options under two categories: "Home Energy Efficiency and Home Renewables" and "Green Transport". Each option includes a title, a brief description, and a right-pointing arrow.

Category	Funding Option	Description
Home Energy Efficiency and Home Renewables	Home Energy Scotland Loan	An interest-free loan funded by the Scottish Government, to help make energy saving improvements to your home.
	Private Rented Sector Landlord Loan	Loan funding for registered private landlords to improve the energy efficiency of their properties.
	Smart Export Guarantee	Financial support for small-scale generators of renewable electricity who export to the electrical grid.
	Warmer Homes Scotland Programme	Government-funded support to install a range of energy saving home improvements for eligible homeowners and private sector tenants who struggle to heat their home.
Green Transport	Domestic Charge Point Grant	Funding to help install a home charge point.
	eBike Loan	An interest-free loan to support the purchase of ebikes, cargo and adapted cycles.
	Low Emission Zone Support Fund	Funding to help you get ready for the low emission zones.
	Used Electric Vehicle Loan	An interest free loan to support the purchase of a second-hand electric vehicle.
